

Solutions of Assignment10

The screenshot displays a web browser on the left and a code editor on the right. The browser shows a page titled "This is Assignment10_3" with the subtitle "Inside Child component" and the text "21 is not prime". Below this, it states "Marvellous Infosystems contains 2 capital letters". The code editor on the right shows the file explorer for "ASSIGNMENT10_3" with the file "child.component.ts" selected. The code in "child.component.ts" defines a component named "ChildComponent" with a selector "app-child", standalone "true", and imports "NumberService" and "StringService". The component has a "No" property and a "len" property, and a constructor that initializes "nobj" as a "NumberService" and "soobj" as a "StringService". The "ngOnInit" method calls "this.value=nobj.ChekPrime(this.No)" and "this.len=soobj.CountCapital(this.name)".
